

Programme 1 LUNA NERA

Luna Nera aims to stimulate interest in the environmental and architectural heritage of localities. By asking the audience to re-look at sites in a new way, Luna Nera is concerned with exploring the conjunction of theory and practice in site-specific/site-responsive work, and invites dialogue between artists. Luna Nera presents their moving-image work, alongside selected works by artists based in London and Berlin.

Selected and presented by Gillian Mclver.

Gillian Mclver studied history and philosophy before starting out as a documentary film maker. Moving from Canada to London, she began to work with experimental and site specific film. She co-founded the Luna Nera group, where she has been artist and curator since 1997.

At TINAG, Luna Nera presents video works from the following artists:
